This is the beginning of a book we hope to develop over a number of years that will be an aid to the retail Nurseryman describing and selling the plants we grow.

Nature produces beautiful flowers but it is seldom that the Nursery customers arrive just at the right time, therefore the Salesman is faced with a difficult job of telling what the flowers look like in bloom. The purpose of this book is to help describe the beauty of our flowers at their best.

In looking for the pictures we find almost as much difference in printing as in the flowers themselves. Therefore in some instances we have gathered two pictures of the same variety. We do not want to confuse the buyer but to show him two views.

Our cover, which we have not dated, because we do not believe it will go out of date, is from the finest prints we could buy. Here we show Camellias and Azaleas that are good varieties and always in demand. We hope your customers will get the same thrill from looking at them as we do in making up this sale book. At present we have some good color to put inside, but if this book turns out successful we hope to add a little each year. Some of our color work did not turn out as we had hoped. No doubt our customers will give us suggestions to tell us what is needed in this book.

We are putting in some blank pages on which you may want to add information for your particular customers.

CAMELLIA DESCRIPTIONS

Pictures show much better than we can describe the beauty of Camellias. We would like to have a good picture of each, but until that is possible we feel that one can get a good idea as to the type and formation by looking at the color reproductions shown. An early variety such as September Morn may look almost identical to Chiro Chan, but September Morn blooms early in the fall season, several months before the Chiro Chan and everyone should have these two fine varieties in their collections. By using the pictures shown for comparison we feel that fairly good descriptions can be established in the customer's mind as to what will show up at blooming time.

ADMIRAL NIMITZ (Kishu Tsukasa) — The leaves are straight, light green, pointed and heavily grained. Flower is large and a beautiful shade of pink with an occasional petal mottled with white. Flower opens flat, mid-season to late bloomer. (Color and formation similar to picture of Rose Dawn.)

ADOLPHE AUDUSSON — This is one of the finest types of semi-double camellias, varying from deep red to red and white variegated, with very large 5 to 6-inch blooms, with prominent stamens irregularly arranged among the heavy textured good petals. Handsome, large deep green leaves. (See picture on cover.)

ALBA PLENA — The finest of all white camellias. The pure white, wax-like full double flowers are about 4 inches in diameter, of perfect symmetry. Splendid for cut flowers. Harder to propagate than most varieties. (See picture on cover.)

ANNA FROST — Semi-double, large loose peony type, dark blood red in color. Large, round and thick green shiny leaves. (Formation and color similar to picture of Warrata.)

ARA-JISHI (Aloha) — Large, double, salmon-red, peony type flowers. It blooms very early. The first flowers come in July and often times bloom through the camellia season. Because of the early blooming habit, we expect this camellia to be very popular in the areas which have damage from cold weather.

BESSIE MORSE BELLINGRATH (Toki-No-Hagasane) — A large semi-double flower, white with a faint blush of pink. A compact grower which blooms mid-season. (See Thelma Dale for formation.)

BETTY SHEFFIELD — Large white variegated red and pink, semi-double to loose peony form. Medium compact growth. This variety also has many beautiful sports. (See picture of Daikagura for form.)

BIG BEAUTY — White blotched and dashed pink. Large, semi-double to semi-peony form. Vigorous, upright growth. (See picture of Joshua Youtz for formation of flower.)

BLACK DRAGON — This is the English translation of a Japanese name of this variety which we imported from Japan before the war. Flowers are very large and very dark red and resemble in color Mrs. Charles Cobb and in form of the Victor Emmanuel. (See picture.) The edges of the petals are crimped and are of a much deeper shade than the balance of the flower.

BLACK DRAGON, VAR. — Same as Black Dragon with flecks of white. Contrast of dark red and white makes this bloom very striking.

BLUSH HIBISCUS — A very large semi-double white with blush pink center. It makes a vigorous upright spreading type growth.

BRILLIANT — Full double red. Petals curve slightly at edges. Mid-season bloomer. (Look at illustration of Pope Pius.)

CAMEO PINK — A very lovely camellia of a soft delicate shade of pink. Full double symmetrical form, showing golden stamens in center when fully open. (Similar to Pink Perfection picture.)

CANDIDISSIMA — A pure white star-shaped full-double. A very profuse late season bloomer. Slow compact type of growth.

CHANDLERI ELEGANS — A most spectacular camellia. Large, loose peony form flowers, 5-6 inches in diameter, with broad outer flat petals, and a thick center cluster of petaloids interspersed with yellow stamens. Variegated, cherry red to light pink, splotted with white. A heavy bloomer, with dark green shiny foliage. (See picture.)

CHIRO CHAN — A beautiful white sport of C. M. Wilson or Chandleri Elegans. (See picture.)

CLAUDIA PHELPS — Large semi-double delicate pink, fading to white on outer margin. A color sport from Duchess of Sutherland. (Color the same as C. M. Wilson, picture on cover, formation the same as picture of Ruth Royer.)

PINK CHAMPAGNE — Large beautiful light pink, good grower with large light green leaves. (See picture.)

C. M. WILSON — A light pink sport of Ch. Elegans. This is an outstanding camellia with all the features of the Ch. Elegans. (See picture on cover.)

PINK CLOUDS — Cream pink, marked deeper pink, changing to light lavender pink as flower ages. Form of flower like Chandleri Elegans.

COLLETTI MACULATA—A variegated peony form dark red and pure white, some flowers having the white predominating and some predominately red. The petals vary from small petals in the center to large flat petals on the outer edge. A very few stamens show in the middle. (See picture of Gigantea for type of bloom.)

COL. FIREY (Mississippi Hastie) — A large deep crimson extremely double flower. Late bloomer. Dark green foliage. (See picture of Pope Pius for formation.)

CONCORDIA (Prince Albert) — Pink and white variegated peony form. Occasionally there is an all pink flower, and some times there are both peony and rose form flowers on the same plant. (See Kumasaka picture for form.)

CORINNE FONDE — Incomplete double, orange-red compact grower.

DAIKAGURA — An outstanding camellia with large, thick peony type blossoms. Sometimes solid pink and other times pink splotted with white. (See illustration.)

JAPONICA HIGH HAT

- DAITERIN (Pink Fimbriata) — Light rose pink. Large, single with mass of petaloids in center. A very fine single.
- MRS. D. W. DAVIS — Very large semi-double, blush pink, vigorous upright growth with large leaves. (See Tomorrow for formation.)
- DEBUTANTE — Large, full peony form, shell pink. Vigorous grower. Early to mid-season bloomer. (See Cover.)
- DERBIANA — Semi-double to peony form dark red with stamens intermingled with petaloids in center. Very vigorous grower. (See Simeon for formation of flower.)
- DONCKELAARI — A very large semi-double red slightly marbled with white. Slow bushy growth. (Like picture of Ville de Nantes, except with smooth petals like Monjisu.)
- DOROTHEA BLANCHE — Delicate pink shaded white. Large, semi-double to peony form. Vigorous upright growth. Mid-season bloomer. (See Chiro Chan for formation.)
- DRAMA GIRL — A very large fine new pink, about the same formation as Tomorrow.
- DUCHESS OF SUTHERLAND — Large semi-double creamy white, with one or two pink stripes on one petal. The outer petals are large and flat, and the inner petals are curled. Has prominent circles of stamens. This beautifully formed camellia is considered one of the finest of the Magnolia Garden varieties. (Ruth Royer and Claudia Phelps are plants of the family, See Ruth Royer picture for exact formation.)
- DUNCAN BELL (Mrs. Memo A. Ladnier) — The blossoms are six inches in diameter, a beautiful orange-red, with large flat, regularly imbricated outer petals, and numerous irregularly arranged small petals in the center, different from any other camellia we have seen. A fast, tall-growing plant, with giant shiny leaves. (See picture of Simeon for formation.)
- ELEANOR HAYGOOD — Large, delicate, pale pink. Rose form, late bloomer, vigorous bloom. (Good for Greenhouse Culture.)
- ELIZABETH (Montironi) — Porcelain white, occasionally a flower will have some pink in it, or there may be an all-pink bloom. The edges of the petals are incurved. A beautiful flower and a handsome evergreen. (See Irene Coker for formation.)
- ELIZABETH ARDEN — Double variegated, color ranging from white with rose stripe to rose. Blossoms when first open have a rose-bud center but later show stamens. A vigorous healthy growing plant. (See picture of Irene Coker.)
- ELIZABETH LEBEY — Large soft pink semi-double to loose peony. Early profuse bloomer. Vigorous grower with pendulous branches. (Formation of flower like picture of High Hat.)
- ELIZABETH BOARDMAN — White. Large to very large, Hemispherical, fluted, semi-double. Medium compact upright growth. (See Joshua Youtz picture.)
- ETHEL DAVIS — A fast growing variety with pleasing pink, large flower. The form of the flower varies from one like Chandleri Elegans to Kumasaka.
- EMILY WILSON — A beautiful pale pink that is most outstanding as a bush in full bloom. Flowers semi-double to incomplete double. Color of High Hat and form of flower like a Herme, good compact grower.
- EMPERATOR—Medium size, deep red, semi-double with petaloids intermingled with stamens.
- EMPEROR OF RUSSIA — Large multicentered double to peony form scarlet red. Slow compact grower. Mid-season. (See picture of Pink Champagne for formation.)
- EMPRESS (Lady Claire, Grandiflora Rosea) — Very large, 6 to 7 inches, semi-double flower. Its broad petals of deep rich pink are arranged around a center cluster of yellow stamens. A strikingly beautiful flower. Fine dark green foliage and compact round bush. (See picture.)

EUGENE LIZZE — Beautiful, semi-double to loose peony-form, cherry-red marbled with white. This is said to be a sport of Donckelaari and has its characteristics of growth. (See Monjisu for color and Ruth Royer for formation.)

FAITH — A good new variety with large flowers formed like Chandleri Elegan. Foliage is dark green and growth is upright.

FANNY BOLIS — Large semi-double red flowers, boldly blotched with white, with enormous heavy-textured petals. The deep green leaves are very thick and rather convex.

FLORENCE STRATTON — Very large formal double. Coloring varies from solid white to solid pink. When flowers are fully open they are very symmetrical with the tips of the petals incurved in a circular design. The flowers exhibited last year in shows caused a great deal of interest. The foliage is very large, crinkled and light green. Very vigorous grower. (See Alba Plena for form.)

FRENCH EMPERATOR — Probably the largest peony type bloom. Soft pink with satiny texture. Very fast upright grower. (See Pink Champagne for formation.)

FROSTY MORN — A very large White anemone to peony form with beautiful long, narrow, slightly twisted foliage. Medium, open, upright growth.

GALILEE — Very large, semi-double to loose peony type, pink, vigorous slender growth.

GIGANTEA — An immense semi-double red with white markings and prominent circle of stamens. Large foliage, irregular upright growth. (See picture.)

GLEN 40 — Deep red. Large, formal to rose form double. Slow, compact, upright growth. (See picture of Pope Pius.)

GLOIRE DE NANTES (Leana Superba) — A large semi-double vivid red flower, with long yellow stamens interspersed with the center petals. Thick dark green, waxy leaves. A very compact grower.

GOSHOGURUMA — Large semi-double dark orange-red with very prominent mass of stamens in center. Compact slow grower. Mid season. (See picture of Tomorrow for formation.)

GOVERNOR MOUTON — A free-blooming variety, with medium size peony form flowers, varying from solid dark red to red and white. (See Chandleri Elegans for form of bloom.)

GUILIO NUCCIO — A 5-6 inch semi-double of unusual beauty. Coral rose with 12-15 wavy petals and 3-5 large rabbit ears. Like Mathotiana Supreme but with fewer petals. Foliage large dark green vigorous, bush growth.

H. A. DOWNING — Very large, loose semi-double flowers of deep red, with stamens showing among the petals. A bushy, slow-growing variety, and late bloomer. (See Empress for form.)

HAKU-RAKUTEN — The flowers are large, semi-peony form, and pure white in color. Vigorous grower and one of the best whites. (See picture of Tomorrow for form of flower.)

HERME (Jordan's Pride, Hikari-Genji, Jenny Lind) — Very large, semi-double white flowers, with red and pink stripes and splotches. Slightly fragrant. Early bloomer, tall, rapid grower. One of the most popular and most satisfactory of all camellias.

IRENE COKER — A new Camellia seedling from Pensacola. This is a nice double white with a pink stripe, a good bush and heavy budding variety.

JARVIS RED — Deep scarlet red, semi-double, with yellow stamens; heavy bloomer. A beautiful and most satisfactory garden variety that holds its popularity year after year. (See Empress picture for form.)

JOSHUA YOUTZ — Large semi-double to loose peony. Blooms of pure waxy white. Blooms in the fall along with the Daikaguras and is similar in size and shape. (See picture.)

KELLINGTONIA — Red and white peony type flower. Blooms heavily every year. A rapid, compact grower, with dark green, glossy leaves. (See Chandleri Elegans for form.)

KENNY — Semi-double deep rose pink with a few white blotches in center. Compact grower. (See Ruth Royer Picture.)

KUMASAKA (Beni-Korake, Lady Marion) — One of the finest of all pinks. A deep glowing pink with very broad outer petals around a large inner circle of curled petaloids. When fully open so the stamens show through the petaloids. (See picture.)

KUMASAKA, VAR. — A variegated form of Kumasaka — Rose pink blotched white.

LADY CHARLOTTE — Clear, pale pink. Large, semi-double. Vigorous, upright, compact growth.

LADY VAN SITTART — A medium sized semi-double with three rows of broad wavy edged petals showing golden stamens in center. A very heavy bloomer.

LA REINE VARIEGATED — Believed to be a Sport of Lady Mary Cromartie. Same type flower except for large spots of white variegation. (See picture of Gigantea.)

LAUREL LEAF (Lallarook) — Imbricated full-double of perfect symmetry, with a salmon rose-pink center, shading to a deeper rose on the tips of the incurved petals. Some blooms have small flecks of white variegation. (See picture of Rose Dawn.)

LETITIA SCHRADER — Dark red, very large, medallion shaped peony form. Medium compact upright growth. (See Warrata picture.)

LILA ROSA — Clear pink, large full peony form. Vigorous compact growth. Heavy blooming, early variety. (See picture of Kumasaka.)

LINDSEY NEIL — Beautiful semi-double to peony form, vivid dark red with well defined white markings. Petaloids intermingled with stamens. Dependable bloomer, very slow compact grower. (See picture of Gigantea form.)

LURIE'S FAVORITE — Soft lavender pink. Large, semi-double. Vigorous, compact, upright growth.

MADAME CHIANG KAI-SHEK — Large semi-double deep rose-pink flecked with white with prominent circle of stamens. Beautiful in its simplicity. (See Empress picture.)

MAGNOLIAFLORA — An unusual shaped blossom of the most delicate shade of blush pink. Nine to ten large petals in a double row open concavely around a small center group of loosely curled inner petaloids with a few golden stamens. (See picture.)

MARCHIONESS OF EXETER — Beautiful light pink, large full peony form. Vigorous spreading loose growth. (See picture of Debutante for formation.)

MARGARETE HERTRICH — Large, white, formal, double. Vigorous upright grower.

MARGARET HIGDON — Large semi-double rose pink, dark green foliage, upright grower. Dependable, mid-season bloomer. (Form of flower like Tomorrow.)

MARGARET HIGDON, VAR. — Same type and characteristics as Margaret Higdon only is variegated.

MARGHARITA CALEONI — Formal double flower with very unusual red and white markings. Has large rosebud center. Good grower and profuse bloomer.

MARY CHARLOTTE — A beautiful shade of delicate pink. Medium large, flat peony form. Vigorous, compact, upright growth. (Flower formed like C. M. Wilson.)

MARY E. M. (Rev. John G. Drayton) — A loose peony-like flower of deep pink, wavy petals, intermingled with golden stamens. Light green foliage, late bloomer. (See Kumasaka.)

MATHOTIANA RUBRA (Purple Dawn, Purple Emperor) — An immense, full double, rose form flower of lake purple, the outer edges of which turn deep purple as the flower gets older. When fully open it shows short stamens in the center. Due to grafting and intensive propagation this variety often sports a variegated flower.

MATHOTIANA SUPREME — Sport of the all-time favorite Purple Dawn. An immense semi-double scarlet bloom with golden stamens interspersed among the curled center petals. Growth and foliar characteristics same as parent variety. (See picture.)

MATHOTIANA VARIANT (C. M. Hovey) — Very double camellia with a high pointed center. The huge flowers are a uniform shade of brilliant scarlet with pure white blotches. The very large petals are beautifully veined and textured.

MONARCH — Deep pink, sometimes spotted white. Large, full peony form. Medium compact growth. (See picture of Daikagura.)

MONJISU — Medium-sized rose red, loosely petaled, semi-double. Petals curve up at outer edge. Mid-season bloomer. (See picture.)

MON LOUIS PINK — Vigorous grower with pleasing pink semi-double flaring type flower. (See Empress.)

MRS. CHAS. COBB — Full peony form camellia of the deepest red. Very large petals with only a few petaloids. This variety has unusually nice foliage and is a vigorous grower. Among the best in the Magnolia Gardens varieties. (See picture.)

NAGASAKI (Lady Audrey Buller, Tenninkwan) — A magnificent camellia with big semi-double blossoms and prominent stamens. The large, thick crinkled petals ranging in color from snow white to carmine, are attractively wavy. (See picture of Monjisu.)

NESSLE RODE — Medium semi-double white with red stripes, often shading to flesh pink in the center. Compact grower, profuse bloomer.

OTOME — Medium, formal double, light pink. Slow compact grower. Mid-season to late bloomer.

PAULETTE GODDARD — Red, very large, semi-double to loose peony form. Vigorous upright growth.

PEARL HARBOR — Dark red. Large, irregular semi-double. Vigorous, upright growth.

PINK PERFECTION — The most universally popular of all camellias. The medium sized double wax-like flowers, of perfect symmetry and exquisite texture, are a delicate shell pink. Blooms profusely from November to March and begins blooming when quite young. Perfect for corsages and cut flowers. (See picture.)

PINK STAR — Large rose-pink petals heavily veined. Irregular semi-double with inner petals in freshly opened bloom resembling a star.

PRIDE OF DESCANSO — White. Very large, semi-double to loose peony form. Vigorous, upright growth. (See picture of White Empress.)

PRIDE OF HOUSTON (Ross) — A large semi-double salmon pink flower, with occasional small spots of white. The center petals are loosely twisted among golden stamens. This is a fine variety for cut flowers, as the stems are very long. Among the latest to bloom in the season.

PRINCE EUGENE NAPOLEON (Imbricata Rubra Plena, Pope Pius IX) — Scarlet, full double, heavy bloomer, and good grower. A fine garden variety because of its heavy blooming. (Picture listed Pope Pius.)

PRINCE OF ORANGE — Orange red. Large loose peony form. Willowy growth.

PRINCESS NAGASKIE (Chiyoda Nishiki) — A beautiful camellia with large semi-double soft pink blossoms marbled white and rose pink. It makes a vigorous, low spreading type growth.

POPE PIUS

JAPONICA
MRS. CHAS. COBB

PROF. C. S. SARGENT — Dark crimson, very full, round peony type. Medium to large-sized flowers, very free bloomer, hardy. A fine standard variety.

QUEEN BESSIE — A white semi-double flower of 3 to 4 inches with stamens. A late bloomer.

REV. JOHN BENNETT — Very large, loose semi-double salmon pink, with prominent stamens. The center petaloids are often streaked with white. The petals are beautifully veined. The plant has long narrow dark green foliage, and is a very good bloomer.

ROSEA SUPERBA, VAR. — Deep rose pink with white variegation. Very large rose form double. Vigorous, compact upright grower. One of the finest varieties. (See picture of Rose Dawn.)

ROSE DAWN — Large rose pink formal flowers similar in form and shape to Alba Plena. A good many of our plants in this variety come variegated which we think adds to its beauty. (See picture.)

RUTH ROYER — This beautiful flower is a sport from the Pink Duchess of Sutherland. It is pink and white with moire markings. The shading from clear pink to pure white makes a brilliant blossom. (See picture.)

SARA-SA (Calico) — A large, semi-double, creamy blush white camellia, striped and flecked with purplish red, with approximately twelve large flat round petals. A very lovely flower.

SARAH FROST — Full double, rose form camellia of medium size. Deep rose red, very hardy, strong vigorous grower.

SCARLET O'HARA — This is a sport of the lovely Colonel Firey. The large, deep scarlet, closely imbricated petals have an occasional small splotch of white. Both of these varieties have long stems which make them very desirable for corsages and cut flowers. Very late blooming variety. (See picture of Pope Pius for form of bloom.)

SEPTEMBER MORN (Yokei Haku) — A very early white, generally blooming the first part of September and continuing until about Christmas time. The outer petals are large and frequently very beautifully tinted with a baby pink blush. (Picture of Chiro Chan is a good picture also of September Morn.)

SIMEON — Vigorous growing, large leaf variety with beautiful large flowers. (See picture.)

SMILING BEAUTY — Semi-double bloom of a very delicate pink. Dark green foliage.

SNOWDRIFT — A lovely, pure white camellia, with large semi-double blooms. The arrangement of the petals around the center cluster of stamens is very attractive, and the texture of the petals is of a very good, lasting quality.

ST. ANDRE — Very large semi-double bright red. Upright grower. Mid-season. (See Tomorrow for type of flowers.)

ST. ELMO (Augusta Wilson) — Soft pink. Medium large, full peony form. Vigorous upright growth. (See Pink Champagne.)

SWAN — This is a semi-double white with long thin snow-white petals shaped like the Imura and the White Hibiscus. It is a very fast, healthy grower and blooms prolifically which makes it a very desirable camellia.

SWEETI VERA — A loosely formed, irregularly shaped full camellia, the ground color of which is light pink. The large petals are flecked and dashed with a deeper shade of pink, and the center petals, which are slightly scalloped, have stamens interspersed among them. (Like Debutante in form.)

THELMA DALE — Beautiful shade of pink. Large, irregular semi-double to rose form double. Medium, spreading growth. (See picture.)

DR. TINSLEY — Two-toned flesh pink with the color fading to almost white at the outer edge of the petals. Medium size, semi-double. (A very distinctive and different Camellia.)

ORIENTAL MAGNOLIAS

Magnolias open up in full bloom at the first of Spring. The large pink and white blooms cover the tree making a beautiful display. They are hardy in all parts of the U. S. and grow on without any special attention.

Our large B & B plants are fine for sales yard. Our packaged plants tagged with colored labels, have been good for over the counter or store sales. Two year old liners are just right for planting out in your field.

We have our own cold storage to keep these plants dormant and ready for moving into a colder climate. We recommend the following varieties:

ALEXANDRIA — Upright growing, flowers large dark purplish pink outside and white inside.

RUSTIC-RUBRA — Large cup shaped, dark reddish purple flowers, with handsome seedpods more than 6 inches long. It is a vigorous grower and especially desirable where a tall spreading Magnolia is wanted. Blooms later than Soulangeana.

SOULANGEANA — (See picture) Most popular variety, upright tree type.

SOULANGEANA-PROLIFIC — Like Soulangeana except a heavier blooming variety. Average size of the bloom is smaller, but the mass effect of the tree is good.

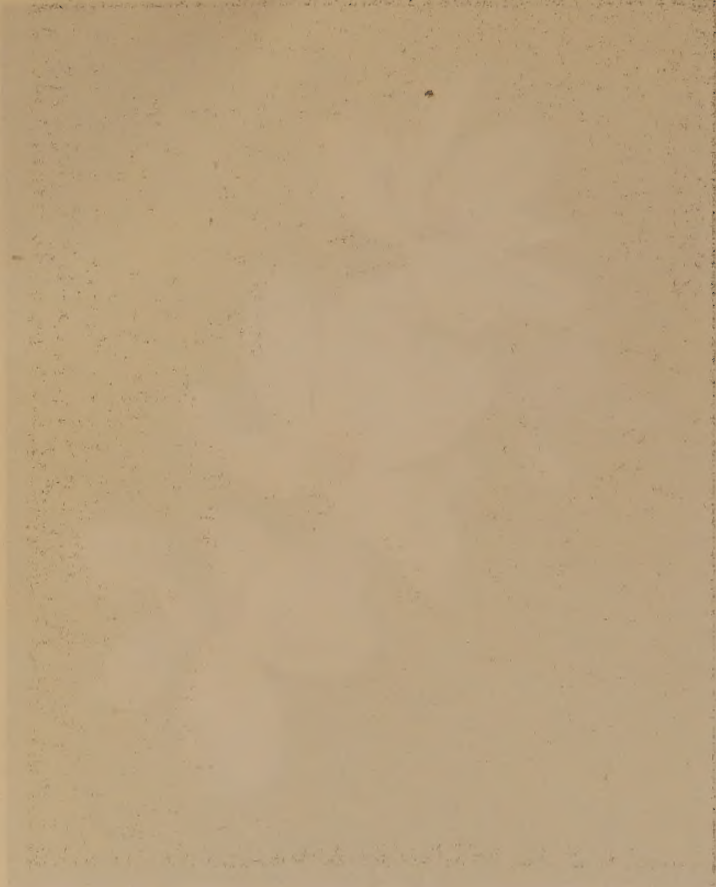

NIGRA — (See picture) A good bushy variety with many stems from the ground. After the main blooming season this variety has some blooms during most of the growing season.

Oriental Magnolia Soulangeana

Oriental Magnolia Nigra

Ornithoglossum

Ornithoglossum

ORIENTAL MAGNOLIAS

Magnolias open up a lot of space in the garden. The large pine and white blossoms cover the trees making a beautiful display. They are hardy in the south of the U. S. and grow on without any special attention.

The tree 7 & 8 plants are the far most good. The magnolia plant with colored leaves like some, but the color is mostly of the leaves. The tree 7 & 8 plants are just right for growing and in the house.

We have not seen this variety. It has some light flowers and mostly in moving into a colder climate. We measured the following varieties.

ALABAMA — Light green leaves large and outside and white inside.

ALABAMA — Light green leaves large and outside and white inside. The flowers are large and white. The leaves are large and white. The flowers are large and white. The leaves are large and white.

ALABAMA — Light green leaves large and outside and white inside. The flowers are large and white. The leaves are large and white. The flowers are large and white.

ALABAMA — Light green leaves large and outside and white inside. The flowers are large and white. The leaves are large and white. The flowers are large and white.

ALABAMA — Light green leaves large and outside and white inside. The flowers are large and white. The leaves are large and white. The flowers are large and white.

★ ★ ★ ★

MAGNOLIA STELLATA

*T*his is an especially attractive plant that grows into a compact bush, seldom reaching the height of more than 10 feet.

In the spring it covers with delicate star-like flowers (as shown in the picture above), followed by large green leaves in the summer.

It is a hardy plant and will do well most any place in the United States.

INDICA AZALEAS

LARGE TYPE

DAPHNE SALMON (Lawsal - Pride of Summerville) - Pleasing salmon pink colored flowers of medium size. Very free flowering, compact, vigorous grower. Very hardy. This variety has become very popular because it blends so well with modern brick homes.

ELEGANS - Light pink flowers of large size. A real spectacle in the yard since it is the first azalea to bloom. Fast upright grower requiring a minimum of care.

FIELDERS WHITE - Large pure white flowers early in the season. A strong grower, free flowering and considered one of the best Indica whites.

FISHERS PINK - Light pink. Blooms mid-season about the same time as Pride of Mobile. Large flowers, profuse bloomer, and compact grower. We think this is one of the best pinks.

FORMOSA - Light purple with pink cast. Large flowers, large dark green leaves, and fast dense grower. Very hardy. The best of its color.

GEORGE L. TABOR - Soft lavender pink faintly streaked darker pink and mottled cerise. Rapid compact grower. Especially good in shaded locations. Blooms mid-season.

INDICA ALBA - Pure white. Light green, hairy leaves, and upright growth. Mid-season bloomer. Hardest of the White Indicas.

MOSS POINT RED - Large orange red flowers. Vigorous, compact with handsome green foliage. A late bloom which will extend azalea blooms in your garden.

PRESIDENT CLAY - Large orange red blooms. Vigorous rather upright grower. Very profuse mid-season bloomer. This variety shares the honors for hardiness with Pride of Mobile and Daphne Salmon.

PRIDE OF DORKING - Large deep red blooms of pleasing shade. Compact vigorous grower with dark green foliage. As a rule the last Indica azalea to bloom. A real contribution in prolonging the beauty of your garden.

INDICA AZALEAS

PRIDE OF MOBILE - This is the finest and most beautiful of all azaleas! Lovely watermelon pink blooms regularly and profusely cover the bushes. The larger plants cover with blooms to such an extent that the foliage is hardly visible, and even very small bushes make a wonderful display of flowers. It is a very hardy variety. We have the true Pride of Mobile, which is much better than many watermelon pinks sold for it, which are not as hardy.

JUDGE SOLOMON - A sport of Formosa with the same foliage and growing habits. Large pink blooms.

ELEGANS

KURUMES • PERICAT • MACRANTHA KAEMPFERI • HARDY JAPANESE

Dwarf and Semi-dwarf Azaleas

This group is comprised of the Azaleas of dwarf and semi-dwarf growth habits. In general their use in the garden is very nearly the same. You will find that nothing enhances the beauty of your garden in the spring more than a border, or a bed of Azaleas. Throughout the years these shapely dark green plants serve as a wonderful evergreen, then they come into their full glory showing a mass of color with the first hint of spring.

Azaleas lend themselves to beautiful bed arrangements with a wide range of color from white to various shades of lavender, pink and red. In recent years more gardeners are mingling their favorite colors in large Azalea beds to produce an effect which will attract the eye of every visitor. You will also find in this group Azaleas sufficiently hardy to grow in all except the coldest regions of the United States.

If you are looking for a plant particularly well adapted to pot plant culture for florist purposes, these Azalea are no doubt your answer. Potted Azaleas are easy to handle and the blooming dates can be controlled to give you the finest blooming pot plants from Christmas through Mothers Day.

PINK PEARL

CORAL BELLS

HINO CRIMSON

SNOW

KURUME — PERICAT and HARDY JAPANESE AZALEAS

Dwarf and Semi-Dwarf

APPLE BLOSSOM - Delicate hose-in-hose flowers. An upright vigorous grower. Blooms mid-season.

BRIDESMAID - Large salmon-pink flowers borne in clusters. Rather upright vigorous grower. Mid-season to late blooming.

CHRISTMAS CHEER - Free flowering of the brightest red, hose-in-hose type blooms. Small, dark green leaves with dense compact bush. One of the earliest to bloom.

CORAL BELL - The most popular pink Kurume azalea. The dainty clusters of flowers are borne in profusion over the entire plant producing a solid mass of the most beautiful pink color you will find among all Kurume azaleas. Compact grower with small round glossy green leaves. Blooms early and is most popular with florists for forcing.

FIREFLY - Large brilliant red, single flowers borne in clusters. Vary hardy compact grower. Blooms early.

FLAME - Brilliant red, suffused with copper, bright and showy. Upright fast grower with good foliage. Blooms mid-season.

HEXE - Slow, compact grower, with large showy crimson red hose-in-hose flowers. Late blooming.

HINO CRIMSON - Similar to Hinodegiri. Good grower. Brilliant scarlet flowers. Hardy.

HINODEGIRI - Very dense compact grower. Presents a real spectacle in the garden when the brilliant red flowers appear in profusion so as to completely cover the plant to form a solid mass of color. Blooms mid-season. Very hardy and over the years has proven to be the most popular of all azaleas. Color similar to Massasoit on cover.

HORTENSIA - Large soft pink hose-in-hose flowers borne in large trusses. Vigorous, compact grower with handsome dark green large foliage. Very desirable.

KAEMPFER - Large single scarlet red blooms. Vigorous upright grower. Very hardy. Blooms late thus extending the charm of your garden in azalea season.

LAVENDER QUEEN - Light lavender. Free flowering to the extent where entire plant is literally smothered with blooms of a very pleasing shade of lavender. Slow dense grower with small dark green leaves. This is the most popular lavender azalea and no doubt the best.

MASSASOIT - Large single red flowers of the deepest red. This relatively new azalea combines many wonderful qualities into one plant. A good grower. Compact, dark green, glossy foliage. Blooms about one week later than Hinodegiri. Blooms of the purest shade red to be found in an azalea.

ROSE PERICAT - Pleasing shade of pink hose-in-hose flowers borne in clusters at the end of every branch terminal. Blooms late avoiding all danger of frost damage. Vigorous compact grower. Popular item with florists.

PINK PEARL - Large, beautiful hose-in-hose pink blooms shaded lighter toward the center. Flowers borne in clusters. Vigorous upright grower and the color blends very well with most azaleas. A semi-dwarf type bush.

PINOCCHIO - Free flowering hose-in-hose brick red blooms. Very dense vigorous grower with good foliage. Blooms early.

SALMON BEAUTY - Large hose-in-hose deep salmon-pink flowers. Compact, vigorous grower with large glossy green leaves. Blooms mid-season. The most popular of the salmon-pink Kurume azaleas.

SNOW - Pure snow white hose-in-hose blooms borne in clusters. Compact grower. Blooms mid-season. There has been an increasing awareness of the contribution white makes in an azalea planting in recent years. A little white scattered among the colors will give life to your azalea planting. Snow fills this need better than any other white azalea. Goes particularly well with Hinodegiri.
